

CombiGuard

Installation Instructions

1 Plant your seedling.

2 Position the coir mat around the stem with the stem centered in the mat.

3 Firmly push the first 3 canes through the holes into the soil approximately 20cm. Splay the canes outwards slightly.

4 Slide the CombiGuard sleeve over the first 3 canes and seedling.

5 Insert the 4th cane into the sleeve, pushing through the remaining hole and at the same time tensioning the guard.

6 View from the top of the installed CombiGuard.
