TreeTube™

KBC TreeTube™ is a heavy duty self-supporting plastic mesh for protecting new plantings.

Features/Benefits:

- Tubes are approximately 250mm dia. when open.
- Support with bamboo or hardwood stakes.
- Shelter flexes under pressure from animals but won't suffer damage.
- Suitable for high wind, exposed and coastal areas.

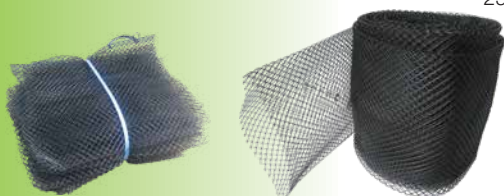

Options Available:

- **Rolls** - Supplied in 30m rolls. Simply cut to preferred length to suit application.
- **Standard Tubes** - Precut to 250mm dia. x 500mm length. Quick and easy installation.
- **Maxi Tubes** - Maxi tubes 1.7m also available, supplied with fibreglass rods.
