

TreeTube™

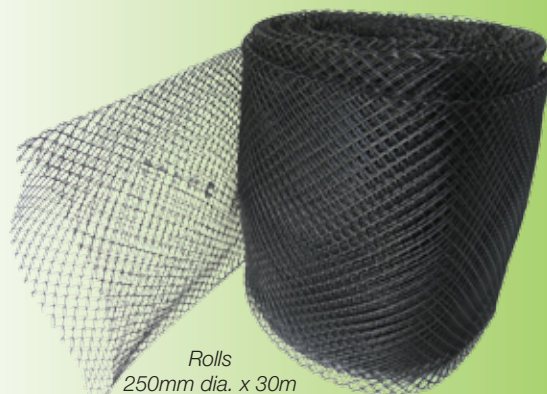

KBC TreeTube™ is a heavy duty self-supporting plastic mesh for protecting new plantings. Supplied as a 30m tube - easily cut to length to suit the application.

Features/Benefits:

- Tubes are approximately 250mm dia. when open.
- Available in 30m rolls. Simply cut to preferred length.
- Precut tubes also available - 250mm dia. x 500mm length.
- Ideal for protection against rabbits, hares, pukekos and sheep.
- Support with bamboo or hardwood stakes.
- Bamboo can be inserted through holes in mesh.
- Hardwood stakes can be secured by cable tie.
