

TriGuard™

KBC TriGuard™ 'wraparound' tree shelters are commonly known as the **tree growers' 'insurance policy'**. They provide great protection from browsing while providing an ideal microclimate for growth.

Quickfold System

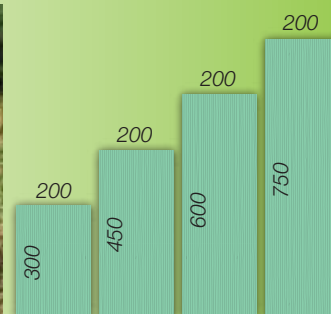

Features/Benefits:

- Translucent twin-wall polypropylene design provides sufficient light and an ideal microclimate for small seedlings.
- Protects against browsing sheep, rabbits, hares, opossum and pukeko as well as wind and herbicides.
- Performs well in high-wind conditions.
- Easy to transport and reusable.
- Takes only one Hardwood Stake (25 x 19mm).
- 'Quickfold' saves installation time and labour cost.
- Lifespan of 2-3 years (depending on environmental conditions).
- Stakes and weedmats are purchased separately.

Combo Option

Save money by purchasing your TriGuards as a Combo with each set including a guard, coir mat and matching stake.
