

TerraPro™ Slow Release Fertiliser Tablets

TerraPro™ Fertiliser Tablets provide a nutrient rich fertiliser kick start for newly planted seedlings, or existing plants, to carry them through the establishment phase.

Features/Benefits

- Tabs will slowly release nutrients over 2-3 years
- Tabs have leaching-resistant properties and will not produce fertiliser burn
- Nutrients target the root zone and will not provide nutrition to surface-rooted weeds or grass
- For new plantings, place tabs in the hole prior to bedding the plant in
- For existing plants, create a spade cut close to the root system and place tabs in the cut
- Available in 100 tab bags for smaller planting projects or 1000 tab cartons for larger projects

Typically contain

Nitrogen 17.50%
Phosphorus 7.60%
Potassium 8.70%
Sulphur 3.80%
Magnesium 5.40%
Iron 0.80%
Manganese 0.10%
Zinc 0.05%
Copper 0.05%
Boron 0.04%

Application

Smaller plants to 40cm - 1-2 tabs

Medium plants to 1m - 2-5 tabs

Larger plants over 1m - 5+ tabs

Code	Description	Pack Qty
