

TerraPave 100% Recycled Content Porous Pavers

TerraPave are an interlocking cellular paving system reinforcing grass or gravel in areas of high traffic or hard stand areas. They are made of recycled plastic and installed with either a grass or gravel filled surface and provide a durable, environmentally friendly reinforced surface able to cope with extremely heavy loads.

- 400T/m² max load capacity
- Made from recycled plastic
- Nontoxic and chemically inert
- Aesthetically pleasing

Applications

- Car parks
- Driveways
- Aircraft taxiways
