FiberGuard™ 2.0

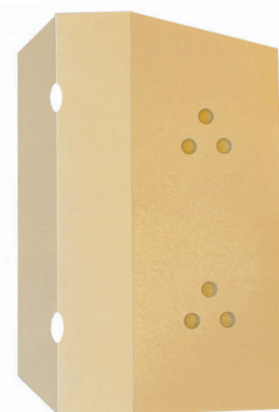

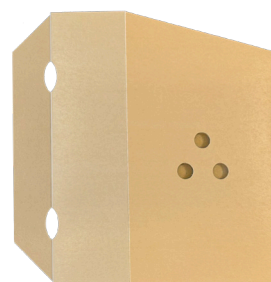

100% Biodegradable Seedling Guard

Designed and created in NZ from natural pulp fibre and coated with a durable food safe moisture barrier.

Features

- Sloped design for easy placement on hillsides
- Manufactured using a tough recycled fibre board that has excellent puncture resistant properties and high bursting strength
- High 'Wet Strength' due to its FDA compliant moisture barrier helping it withstand damp environments
- Fast and secure install with its pre-assembled design.

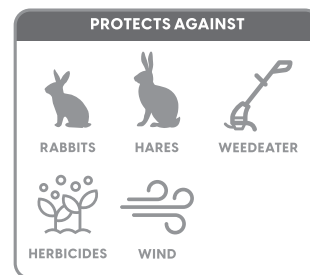

Benefits

- Significantly increases plant survival rates
- Creates its own micro-climate to help plants survive and enhance growth
- Provides good protection in the field for up to 24 months. The rate of degradation is dependent on climate and site conditions.
