

FiberGuard™ 2.0

100% biodegradable tree & plant protection

The same reliable guard with improved design!

NEW pre-assembled guard an absolute game changer:

- Save up to 50% installation time & decrease labour costs
- Effectiveness & durability proven with over 1 million sold
- Simplistic design suitable for volunteers and young people
- Biodegradable matting options available

The FiberGuard plant guards are an earth friendly method of protecting young plantings from browsing animals, wind and sprays.

100% biodegradable, they can be recycled or left intact and will biodegrade over a period of time.

Benefits

- Significantly increases plant survival rates
- Creates its own micro-climate to help plants survive and enhance growth
- Provides good protection in the field for up to 24 months. The rate of degradation is dependent on climate and site conditions.
