

# FuturFiber® Hemp Mats & Rolls

Hemp is one of the strongest natural fibres on earth, providing the durability of a synthetic fibre while still being fully biodegradable.

Biodegradable matting needs to be planted out promptly to work effectively.

**FuturFiber® Hemp Matting harness the strength and absorbency of hemp fibre creating a moist environment for plant growth, while providing unmatched weed suppression qualities.**

- Made from New Zealand hemp fibres blended with pure sheep's wool guaranteeing unmatched sustainability and quality
- Discourages weed growth and eliminates the need to apply harmful herbicides
- Superior water holding capabilities
- Very porous so will not impede air circulation or water and fertiliser penetration
- Mitigates soil temperature fluctuations for surface roots
- Designed to biodegrade over time

Custom size rolls up to 6m wide can be requested as well as custom weights 300 - 1200gsm

**FuturFiber® Made by Rubisco** is a collaboration between Rubisco and Advance Landscape Systems, bringing high-performance natural fibre geotextiles to the New Zealand market.

**Important:** Before installing mulch matting or weed matting, thorough eradication of weeds from the area to be covered is strongly recommended. We advise spraying the site with an Organic Herbicide and allowing a few days before installing the matting.
