

TerraBlock™ Root Barrier

TerraBlock™ Root Barrier is designed for sub-surface use to prevent the migration and spreading of plant roots that could cause costly damage to nearby drains, foundations and hard landscaping.

Features/Benefits

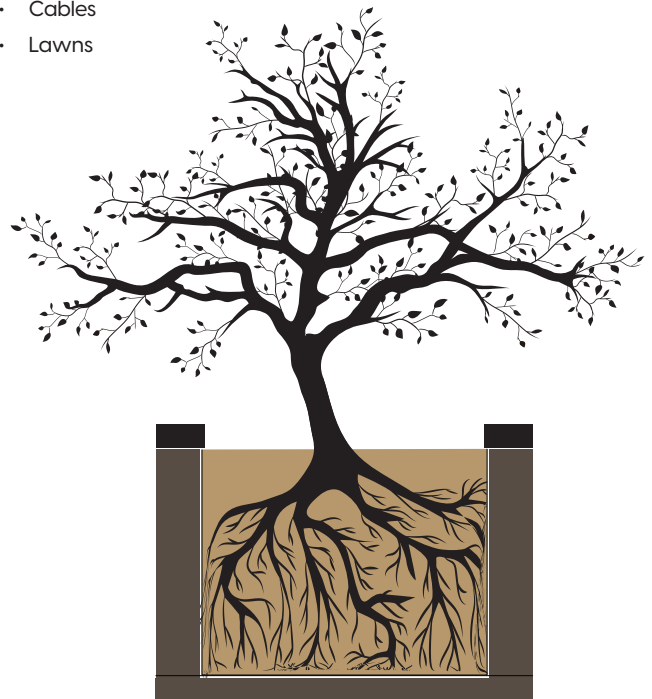

- Manufactured from heavy duty, high density recycled polyethylene (HDPE)
- Will withstand penetration by even the most vigorous of tree roots
- Resistant to UV, chemicals and fungus
- Available in 50m rolls of either 500, 600, 1000 or 1500mm widths at 1.2mm thickness

Application

Prevent root damage to:

- Buildings
- Walls
- Paths
- Drainage pipes
- Cables
- Lawns
