TreeSip Watering Ring 75 Litre

The TreeSip watering ring is a low-profile device designed for efficient tree and shrub irrigation. Its 5–8-hour drip system ensures consistent root hydration, promoting healthy growth.

The watering ring features built-in slow-release nozzles to distribute water evenly, while a welded tag with a hole allows secure staking in windy conditions to prevent displacement. It provides reliable watering for various applications and is ideal for rural plantings, council parks, and landscaping projects.

Features/Benefits

- Delivers quick, efficient watering.
- Simple and quick to setup.
- Encourages root growth with 3-4 days between waterings.
- The rings are tough, flexible, and are manufactured to suit harsh NZ conditions with a 5 year UV rating.
- Suitable for trees up to 15cm in diameter.

Usage and Handling:

- Use clean water only. Sediment or vegetation may block the drip holes.
- Never attempt to move or transport the ring when full.
- Take care not to rip or tear the fill opening.
- Ensure ground and tree trunk are clear of any sharp edges or objects.
- Keep the ring away from small children.
