

Aquamark® 400 Polypropylene Pond Liner

Aquamark® is a high quality Polypropylene based polyfabric designed for lining ponds and dams. Aquamark® consists of the PP base scrim with a highly flexible, UV stabilised PP coating.

Aquamark® is a scrim reinforced polypropylene coated fabric, specifically designed for a wide range of water and effluent containment and storage applications.

Lightweight, flexible and tough, Aquamark® exhibits excellent welding characteristics and is water potable, certified to AS/NZS 4020 standards, suitable for use as a dam/pond lining and a highly durable tank liner.

Applications

- **Construction:** Provides a reliable water barrier for reservoirs, lakes, and stormwater systems, ensuring structural stability and reducing water loss
- **Landscaping:** Ideal for garden ponds and water features, offering durable, long-lasting water containment for decorative and functional landscapes
- **Drainage:** Prevents water infiltration into soil, protecting infrastructure and ensuring efficient water management in urban and rural areas
- **Forestry:** Supports water storage systems for irrigation, firefighting, and habitat creation, enhancing forest ecosystem sustainability
- **Agriculture:** Conserves water in farm ponds, reservoirs, and livestock watering systems, improving agricultural efficiency
- **Aquaculture:** Maintains a controlled environment for fish and shrimp farming, preventing seepage and ensuring water quality for healthy aquatic species

Features/Benefits

- Comes with 20-year UV warranty
- Watertight performance achieved with double heat-welded joints
- 400gsm flexible polypropylene allows for immediate installation
- High-strength layered construction with a woven base for exceptional stability and durability
- UV-stabilized coating ensures resistance to flex cracking and provides excellent chemical durability
- Non-leaching design eliminates harmful plasticisers
- Certified to AS/NZS 4020 standards, making it suitable for potable, grey, and black water storage
- 400gsm, 0.50mm nominal thickness
- 100% recyclable

Code	Description	Colour
44210	Polypropylene Pond Liner 400gsm	Black
